

# Juhyun Bae

M.S. Candidate, Electrical Engineering  
Deep Image Processing Laboratory, Korea University  
(+82) 010-9309-5575 · qowngus33@gmail.com

## Research Profile

Research interests in image restoration, computational photography, and learning-based data augmentation.

## Education

|                                                                                                                                    |                                                                   |
